### A report of a webinar on "Progressive Web Apps"

On 24th June 2020, a webinar on "Progressive Web Apps" was conducted by IQAC for IT & CSE students. The program aimed to provide awareness and knowledge about Progressive Web Apps (PWA) and their benefits.

The program was attended by more than 187 participants from different departments. The session was conducted by **Dr. Sakthivel**, a seasoned IT professional and expert in the field of Progressive Web Apps.

The webinar started with an introduction to the concept of PWA and its advantages over traditional mobile apps. The speaker provided practical insights into the technical aspects of PWA, such as service workers, web app manifests, and app shell architecture.

The session covered topics such as the advantages of PWA, such as faster loading times, improved user experience, and reduced development costs. The speaker also highlighted the benefits of PWA for businesses, such as increased customer engagement and retention.

The program included a live demonstration of how to build a PWA from scratch, using modern web development tools and techniques. The participants were able to follow along with the speaker, and the session provided practical insights into the development process for PWA.

The program concluded with a Q&A session, where the participants asked various questions related to PWA development and implementation. The participants appreciated the insights shared by the speaker and the practical strategies provided to develop PWA.

Overall, the webinar on "Progressive Web Apps" provided a platform for developers and IT professionals to gain awareness and knowledge about PWA and their benefits. The program equipped them with the necessary skills and knowledge to develop and implement PWA, thereby promoting the adoption of modern web development practices in the industry.
