REPORT

Faculty development programme on “GATE and Government Job Opportunities for Engineering Graduates” on 13.12.2021.

On December 13th, 2021, an awareness program on "GATE and government job opportunities for engineering graduates" was conducted by our College. The program aimed to provide final year engineering students with an understanding of the Graduate Aptitude Test in Engineering (GATE) and the various government job opportunities available for engineering graduates.

The program was attended by more than 250 final year engineering students from various departments of the college. The sessions were conducted by **Mr. Sathyamoorthy (UNACADEMY)**, Subject a renowned expert in the field of GATE preparation and government job recruitment.

The program covered various topics related to GATE and government job opportunities, including an overview of the GATE exam, eligibility criteria, exam pattern, and preparation strategies. The program also discussed various government job opportunities available for engineering graduates, such as in the public sector undertakings (PSUs), Indian Engineering Services (IES), and the Defence Research and Development Organization (DRDO).

The first session focused on the GATE exam and its importance for engineering graduates. The session highlighted the eligibility criteria, exam pattern, and the various engineering disciplines covered in the exam. The session also discussed the benefits of appearing for the GATE exam, such as eligibility for higher education and employment opportunities.

The second session focused on the preparation strategies for the GATE exam. The session discussed the different resources available for GATE preparation, such as textbooks, online resources, and coaching institutes. The session also provided tips on time management, subject-wise preparation, and mock test-taking strategies.

The third session focused on the various government job opportunities available for engineering graduates. The session discussed the different job profiles available in the PSUs, IES, and DRDO, and the eligibility criteria for these jobs. The session also provided insights into the selection process and the various stages of recruitment.

The program concluded with a feedback session where the participants shared their experiences and feedback on the program. The participants appreciated the insights shared by the speaker and the practical strategies provided for GATE preparation and government job recruitment.

Overall, the awareness program on "GATE and government job opportunities for engineering graduates" provided a platform for final year engineering students to gain insights and knowledge on the GATE exam and the various government job opportunities available for engineering graduates. The program equipped them with the necessary skills and knowledge to prepare for the GATE exam and to explore the various government job opportunities available, thereby enhancing their employability prospects.
